

RESPONSIBLE MINERALS ASSURANCE PROCESS ASSESSMENT REPORT

The flagship program of the RMI, the Responsible Minerals Assurance Process (RMAP), formerly the Conflict-Free Site Program (CFSP), takes a unique approach to helping companies make informed choices about responsibly sourced minerals in their supply chains. Focusing on a “pinch point” (a point with relatively few actors) in the global metals supply chain, the RMAP uses an independent third-party assessment of facility/refiner management systems and sourcing practices to validate conformance with RMAP protocols and current global standards. The assessment employs a risk-based approach to validate facilities' company level management processes for responsible mineral procurement. Companies can then use this information to inform their sourcing choices. For more information, please visit: www.responsiblemineralsinitiative.org.

I. ASSESSMENT SCOPE

Facility Name	Malaysia Smelting Corporation Berhad (Port Klang)
CID Number	CID004434
Facility Address	Lot 6,8 & 9, Jalan Perigi Nanas 6/1, Pulau Indah Industrial Park, West Port, Port Klang, Pulau Indah, Selangor 42920 Malaysia
Assessment Date(s)	01/14/2025 - 01/17/2025
Assessment Type	Re-assessment
Assessed Material	Tin
Sourcing from High-Risk Supply Chains	Yes
Assessment Cycle	1 year
Assessment Period	12/01/2023 - 11/30/2024
Assessment Company	Arche Advisors

II. ASSESSMENT OBJECTIVES

The objective of the assessment is to assess the facility’s level of conformance with the Responsible Minerals Assurance Process Tin Standard of Tin 2017.

Indicate which operations take place at the site and are under the same management control	
<input type="checkbox"/>	Mining
<input type="checkbox"/>	Blending
<input type="checkbox"/>	Solvent Extraction and electrowinning
<input checked="" type="checkbox"/>	Smelting
<input checked="" type="checkbox"/>	Refining

<input type="checkbox"/>	Other (please specify)
--------------------------	------------------------

III. ASSESSMENT METHODOLOGY

The assessment consisted of collecting and reviewing objective evidence including documentation, management and employee interviews, and other observations demonstrating that the facility/refiner's due diligence management system conforms, in all material aspects, to the requirements of the applicable Standard.

IV. CONCLUSION

Assessment Results:	
<input checked="" type="checkbox"/>	The assessment was conducted in accordance with ISO19001:2011 Standard, taking into account the guidance provided by the Responsible Minerals Assurance Process. The assessor verified the scope, selected samples, and gathered objective evidence through documentation review, interviews, and visual observations.
<input checked="" type="checkbox"/>	The assessor found that the facility's due diligence system are in conformance, in all material aspects, with the requirements of the Responsible Minerals Assurance Process Tin 2017.
<input type="checkbox"/>	The assessor identified material non-conformance(s) between the facility's systems, processes and practices and the requirements of the Responsible Minerals Assurance Process Tin 2017. Material non-conformance(s) relate to:
Assessor Statements:	
<input checked="" type="checkbox"/>	The information provided by the facility is true and accurate to the best knowledge of the Assessor(s) preparing the report.
<input checked="" type="checkbox"/>	The findings are based on verified objective evidence relevant to the time period for the assessment.
<input checked="" type="checkbox"/>	The Assessor(s) have acted in a manner deemed ethical, truthful, accurate, professional, independent and objective.
<input checked="" type="checkbox"/>	The Assessor(s) are properly qualified to carry out the assessment.
<input checked="" type="checkbox"/>	There were no limitations to this assessment.
